## LETTER OF RECOMMENDATION

### To Whom It May Concern,

It is my pleasure to recommend **Omar Fattouh**, who successfully completed the **Security Operations Centre (SOC) Analyst Internship Program** at EncryptEdge Labs. This rigorous eight-week program is designed to train aspiring cybersecurity professionals in threat detection, incident response, and compliance, and Intern consistently demonstrated exceptional technical skill, analytical thinking, and professionalism throughout.

During the program, Intern excelled in key SOC analyst responsibilities, including log management and analysis, security monitoring, and incident categorization. They effectively utilized tools like the ELK Stack, Wazuh, and SIEM platforms to analyze network activity and respond to potential threats. Their capstone project—a comprehensive incident response and threat detection exercise—was particularly impressive, showcasing their ability to apply advanced analysis techniques and deliver actionable insights.

In addition to their technical expertise, Intern exhibited excellent problem-solving and communication skills. They worked collaboratively with peers, maintained attention to detail during vulnerability management tasks, and delivered a reflective presentation that highlighted their professional growth and understanding of SOC operations.

I am confident that Intern will be an asset to any organization or academic program they pursue. Their technical proficiency, strong work ethic, and dedication to excellence make them an outstanding candidate. Please feel free to contact me at [Laraib@encryptedgelabs.com](mailto:Laraib@encryptedgelabs.com) for further details.

Yours faithfully,

Laraib Arshad  
Chief Executive Officer  
EncryptEdge Labs Limited
